

P-05-966 REVERSE Minimum price Alcohol

This petition was submitted by Raymond Mainwaring having collected a total of 64 signatures.

Text of Petition

Stop Minimum price for alcohol. The people of Wales have NOT voted for this STUPID Law. There is NO evidence anywhere in world that this works. All it will do is penalise the less well off and pensioners, people on good money like Government members won't feel the effect of a law imposed on us. The trial in Scotland has hardly been a success with drink consumption if anything rising and more people turning to drugs and a big increase in shoplifting. Do we want this for Wales? When are people in Government going to learn, no form of prohibition works. Check history.
