

P-05-1089 Wales should lead on bringing NHS pay back in line with inflation costs over the last 10 years

This petition was submitted by Dyfan Roberts having collected a total of 190 signatures.

Text of Petition:

Since April 2010 some NHS staff have had their pay decreased by as much as 20.51% in line with inflation.

It's time the Welsh assembly discuss about forming a new pay deal that will be taking place in 2021 and drastically reduce or eliminate the loss front line workers have been subject to over the last 10 years.

Last time we were given a pay rise it was a replica of Westminster's deal! It's time WAG acted first and gave the NHS a deal it deserves.
