## Appendix 1: Alignment Matrices

This appendix shows how our areas of key development in 2022/23 align

1. With the Ministerial priorities and NHS Wales Planning Framework
2. With our Targeted Improvement Framework
3. With the Well-being of Future Generations
4. With our Plan on a Page and the '5 Planning Principles'
5. With our Transformation delivery programmes

# Mapping of our Plan against Ministerial priorities and the NHS Wales Planning Framework

## ▪ **Ministerial Priorities**

[https://gov.wales/sites/default/files/publications/2021-11/nhs-wales-planning-framework-2022-2025\\_0.pdf](https://gov.wales/sites/default/files/publications/2021-11/nhs-wales-planning-framework-2022-2025_0.pdf)

**Every** area of development included in 2022/23 as a priority, accords with the Ministerial Priorities outlined in the NHS Wales Planning Framework 2022-25. Each has been shaped to maximise delivery against these priorities.

<b>Ministerial Priorities</b>
A Healthier Wales
Population Health
Covid – response
NHS recovery
Mental Health and emotional wellbeing
Supporting the health and care workforce
NHS Finance and managing within resources
Working alongside Social Care
Cluster Planning

The matrix on the next page maps the Ministerial Priorities and Planning Framework against our key activities laid out in the main IMTP document.

The matrix demonstrates a strong alignment with Ministerial expectations in those activity developments that were already underway at the point the Ministerial priorities were published.

New activities profiled for 22/23 align very strongly with the Ministerial Priorities and NHS Wales Planning Framework.

There are a small number of activities which do not strongly align with any of the key priorities. However those activities align well with our additional priorities of delivering against our NHS Wales Targeted Intervention framework, and increasing digital maturity.

*Note a flag in the following matrix has been made where there is a strong alignment with a particular Ministerial Priority. Where a flag is not entered, most schemes still display a softer alignment.*

## Mapping of our Plan against Targeted intervention.

The Health Board is currently in 'Targeted Intervention' by Welsh Government, and as such has a Targeted Intervention Framework in place, outlining the areas where particular improvement is required. Those areas are mental health, strategy planning and performance, leadership, and engagement.

In addition to the general Ministerial Priorities for NHS Wales organisations, and the focused activity of NHS Recovery required as a consequence of Covid-19, we have structured our developmental activities towards addressing these targeted intervention areas.

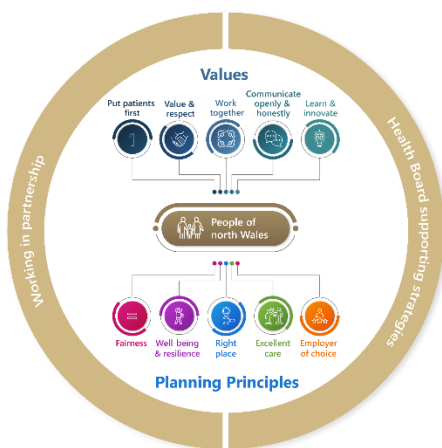

Particularly relevant activities (using references from the main IMTP document) that map against targeted intervention requirements are shown in the following table:

## Mapping of our Plan against the Well-being of Future Generations Act.

We have given full consideration to our duty under the Well-being of Future Generations (Wales) Act. Our 5 [Planning] Principles (5P's), referenced earlier in this appendix, were created with the WBFG Act firmly in mind, and our 5P assessment process, to which all schemes are tested against, require schemes to maximise contribution to delivering the well-being goals.

## Mapping of our Plan against the 5 Planning Principles within our Plan on a Page.

### Plan on a Page – the 5 Planning Principles

Our Plan on a Page distils onto a single side of paper how we can best deliver our vision. Captured within it our 5 Planning Principles against which we will test our developments.

Put simply, the more closely a development aligns with the Principles the nearer it takes us to delivering our vision.

Not all of the principles will apply to each scheme equally, but the opportunity to maximise alignment with each principle should be taken.

As schemes are considered and assessed, scheme proposers are asked to address any areas where greater potential alignment with these principles is identified.

Schemes should not, save for very exceptional reasons, adversely score against any of the five principles.

Through design of the principles, and the check and challenge of schemes against those principles, this approach:

- Optimises progress in delivering our vision
- Embeds the Wellbeing and Future Generations goals into all of our developments
- Delivers the philosophy within A Healthier Wales of high quality care, delivered as close to peoples homes and communities as possible
- Ensures that we shift focus away from complex, reactive, medical interventions to proactive prevention, and the social model of healthcare
- Allows us to offer the best possible care within the resources available to us

## Mapping of our Plan against our Transformation Programmes

There is a significant component of transformation work, planned or to be consolidated. Within the context of A Healthier Wales, and our current status of being in “Targeted Intervention” this is as it should be.

However we need to be clear in our commitment to transformation to ensure that this work is supported, and coordinated, to successfully deliver the improved outcomes we wish to see.

The activities within this IMTP coalesce around a smaller number of transformation programmes. Some projects or schemes could cut across multiple transformation programmes, and where this is the case they are shown in the following illustration against their ‘index’ programme.

Each programme is supported to maximise focus and success:

1. Centrally coordinated programme management is provided, adhering to best evidence and improvement science
2. Progress is tracked against metrics that are SMART and aligned to clinical outcomes
3. Sustainability, quality and efficiency are key components, with IHI principles, value based care and Lean methodology all utilised
4. Our 5 Planning Principles have been created to test our proposals against A Healthier Wales

### Unscheduled Care

Note that unscheduled care is the subject of one of our specific transformation programmes. This programme serves to

- bring together the various pieces of unscheduled care schemes outlined in the main IMTP and in the following graphic, which span across the whole integrated health board
- is focused around delivering the NHS Wales 6 Goals for Urgent and Emergency Care
- is being delivered cognisant of the pressures upon the whole system, for example the Welsh Ambulance Services NHS Trust (WAST). We recognise the implications of short-term and reactive service change on partners, and WAST, and commit to engaging as early as possible on any unplanned service changes which might be necessary in light of the volatility and significant pressures across the health system. The focus will be on partnership and collaboration to deliver the required innovation and improvements ensuring longer term sustainability and improved population health.
