

P-04-326 No to Incineration

Petition wording

We call upon the National Assembly for Wales to urge the Welsh Government to revise its planning policy and policy on residual waste to provide a presumption against the building of incinerators, which send most of the carbon from waste into the air as CO₂, emit ultra-fine particles that can be damaging to health, and create toxic ash. We believe that incineration is bad for the environment and bad for people.

Background

This petition was raised by Friends of the Earth Cymru and collected 1299 signatures.
