

P-06-1379 Ban the sale of single-use vapes

This petition was submitted by Joseph Pashley, having collected a total of 455 signatures.

Text of Petition:

Single-use vapes are becoming increasingly popular, particularly amongst younger people & there is an increasing trend of these being disposed of incorrectly. Whilst the components are recyclable, they are typically, at best, thrown into general waste & more often than not are left as litter in public areas, causing problems for the local environment.
