17 January 2017

Dear Mike,

**Petition P-04-682 Routine Screening for Type 1 Diabetes in Children and Young People**

Further to my letter of the 1 November 2016, I am writing to update you on recent correspondence regarding the above petition.

You will be aware that the Committee wrote to the Children and Young People's Wales Diabetes Network to seek up to date information on action to improve outcomes for children and young people with Type 1 diabetes in Wales. The Network provided us with information on the study currently underway in Germany into whether a screening programme for Type 1 diabetes is feasible across a large population (attached).

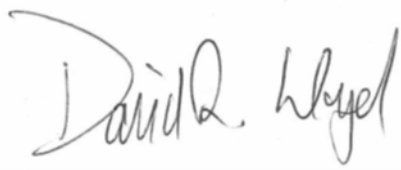

Following receipt of this information, the Committee agreed to await the outcome of that study, which we understand is due to conclude later in 2017.

This will then inform any further work the Committee may decide to undertake in this regard or any other correspondence it may decide to send to the Cabinet Secretary for Health, Well-being and Sport.

I hope you find this update helpful.

Yours sincerely,

A handwritten signature in black ink that reads "Dai Lloyd". The signature is written in a cursive, flowing style.

Dr Dai Lloyd AM  
Chair, Health, Social Care and Sport Committee
